PREBLE-RISH, LLC

The owner is responsible for providing the status water system and O&M's according to the schedule and submitting reports to the Planning Director or his authorized representative every three (3) years to document that inspections have been completed and necessary maintenance has been performed. The first inspection report is due December 31 of the first year after construction has been completed. Inspection reports are then due by December 31 of every third year following approval of the last report. The Planning Director or his authorized representative must be notified of any change in ownership. Failure to file the three year inspection reports and perform required maintenance activities could result in enforcement action.
